Health Care

Smeed Communication Services

The Healthy Link Between Patient & Caregiver

Since 1946, we've helped Healthcare Professionals customize communication systems to meet their specific demands. Smeed has factory-trained technicians and sales staff offering 24/7 service and response. Helping professionals to provide a safe, peaceful, healing environment.

Today, as one of the region's largest single-source suppliers, we have access to the most advanced electronic and telecommunications equipment and software. We also have the expertise necessary to design, install and service the systems we provide.

Smeed Communication Services - Helping Caregivers with Sound Decisions Since 1946.

In an environment where patient satisfaction and safety is crucial, Smeed Communication Services has proven to be the right prescription. The equipment, services and training we provide not only strengthen the critical link between patient and caregiver, but also help the hospital locate personnel and resources quickly, both in and out of emergency situations.

Smeed specializes in state of the art, easy to use communication systems for new facilities, or system upgrades and integration of existing communication networks. Our platform is the Responder IV NurseCall System, integrating nurse call, wireless phone, pocket page, Tracer Locator System and your local area network into one seamless communications solution. From an independent dentist office to a major regional medical center, everyone gets caring and professional service from the Smeed family of employees.

On the reverse, you will find a partial listing of products and services we offer the health care community. If you are currently considering developing or updating any of our listed systems, one of our specialists would be happy to consult with you. We can be reached by phone, or visit us on the web.

Smeed Communication Service is an authorized dealer for; Rauland, NEC, Bose and Biamp.

Connecting Your Medical Facility with Tomorrow's Technology

Communication SOLUTIONS *specifically for* Health Care

Nurse Call

The Responder IV nurse call system is the most advanced, easy to use Nurse call system available. We can integrate everything from the bed, wireless phones, to alarm notification directly to the responsible caregiver.

Personnel Locator

Since it is absolutely critical to locate someone in an emergency, our systems will display the current location of the desired personnel in real time.

Pocket Paging Systems

Owning your own paging system is a cost-effective solution for your on-site communications needs. Smeed paging can offer the versatile, affordable equipment to provide that solution.

Asset Tracking

This system is similar to the Personnel Locator. It will display the current location of the desired piece of equipment. This is one way hospitals can help manage the growing cost of health care. By keeping track of equipment, hospitals may not need to purchase as much duplicate equipment.

Meeting Room Sound Systems

Our sound systems with automatic operations can optimize performance while providing convenience and versatility. Linking various systems for automatic operation enhances efficiency. Integration can include the audio systems for sound reinforcement, recording, playback, listening assistance, or broadcast media. Also, the audio system can integrate with video systems for natural audio quality in recordings and for controlling camera views in relation to the person talking.

Music Systems

Smeed designs background music applications for professional offices, restaurants, hospitals and clinics - anywhere that requires a pleasant and comfortable atmosphere.

CCTV/Closed Circuit TV

CCTV first began by replacing film-monitoring systems. Today, the sophisticated specialization of Smeed-installed CCTV equipment enables users to monitor virtually anything and anyone, anytime and anywhere. Building owners are well aware of this and are beginning to demand the integration of CCTV security into more and more initial building concepts, as a means of combating rising risks of liability and property crime.
